Leadership Insights

Chairman

Dr. Md. Miran Shah Chowdhury
Chairman.
DataBind Technology

Creating a Successful Digital Future

Dr. Miran has an excellent track record for building, unifying, and organizing teams that deliver results. He is committed to empowering people to reach their fullest potential in supportive, high-trust environments. Dr. Miran brings over 27 years of experience in fintech, digital innovations, Smart banking and digital economy to develop a collaborative culture on the path to digital success and business optimization. In addition to leading the strategic vision for DataBind's service, he is passionate about investing in and partnering with early-stage tech companies. As a chairman, our DataBind teams believe in our clients' vision just as much as we believe in the software we deliver.

Glimpse DataBind

Your Vision-We Win

DataBind Technology is a government-registered IT firm and a member of the Bangladesh Association of Software and Information Services (BASIS). Since 2020, we have been recognized as a best-in-class company by the industry's most respected institutions. Our expert team excels in designing and implementing innovative solutions that meet even the most unique business needs. We leverage a global network of top tech leaders, ensuring that our developers have access to cutting-edge technologies and products.

Leading firms worldwide rely on us to provide forward-thinking technology strategies that support their current and future business goals. Our commitment to excellence and adaptability has translated into exponential growth for our clients across various industries. DataBind specializes in AI, Machine Learning, Big Data, FinTech, ERP, and mobile app development, as well as emerging technologies like IoT, XR, and cloud solutions.

Our dedication and technical expertise set us apart as a true partner, capable of transforming a company's vision from inception to completion while defining new industry best practices. We are proud to leverage our years of expertise to help companies and institutions turn their ideas into tangible products that improve lives and transform industries on a global scale with digital solutions and the latest technology trends.

Vision

Today's realities and tomorrow's possibilities with a focused digital solution.

Mission

We start with your mission to make your business shine. The team is to provide focused support to key stakeholders of emerging economies by offering critical analysis and key insights derived from cutting-edge investigations of major technological issues.

Our Values

Integrity

We uphold honesty, trustworthiness, and maintain high ethical standards as integral parts of our culture.

Innovation

We value efforts, ideas, and methods that push the boundaries to continually enhance our business processes.

Excellence

We are dedicated to achieving outstanding performance in everything we do, striving for excellence as a cornerstone of our approach.

TEAM

At DataBind Technology, our Business Technologies team comprises highly skilled professionals with extensive experience in diverse areas of Information Technology. Led by our proficient management, we ensure that each team member excels in their specific tasks through close collaboration and support. This cross-section of expertise enables us to offer comprehensive solutions, providing our clients with a one-stop-shop environment for all their technological needs.

Board Members

Our Board Members bring over 15 years of experience in business advisory and consulting to DataBind Technology. Their extensive expertise and profound understanding have been instrumental in driving our organisation forward.

Advisors

Our advisors work closely with team members across all business processes, facilitating seamless coordination and collaboration. This synergy is fostered by our tightly-knit company culture, enabling effective communication and alignment towards our goals.

Building a Smarter Future Through Technology-Driven Growth.

DataBind Technology has quickly established itself as a leader in technological innovation, starting with financial services for local and international banks. Our rapid growth is evident through our expanding portfolio, which includes the first online Jamdani Sharee Customization marketplace, as well as business ERPs, Academic ERPs, eCommerce, FinTech, AI, LLM, Chatbot and Big Data solutions. Our unwavering commitment to excellence and adaptability has consistently attracted more customers and diversified our services globally.

DataBind

Technology's Services

Building Success Through Innovation and Expertise.

FinTech Solutions

Our FinTech services empower clients with secure, efficient solutions like core banking systems, mobile banking apps, and integrated payment gateways. We prioritise user experience and compliance, helping businesses enhance financial processes while ensuring data security.

Software & Web Development

We partner with businesses to bring their unique ideas to life, delivering custom software and web applications that meet specific needs. Our agile development process ensures rapid deployment and ongoing support, allowing clients to scale and adapt as their business grows.

Custom ERP Solutions & E-Commerce

We develop customized ERP systems & E-Commerce Solutions that streamline operations across various sectors, including healthcare, finance, and manufacturing. Our tailored solutions enhance productivity and provide comprehensive insights, allowing clients to manage resources efficiently and make informed decisions.

SaaS Applications

We develop scalable SaaS applications that streamline client operations and enhance user experience. Our solutions are tailored to specific business requirements, ensuring seamless integration with existing systems while providing ongoing support to maximize return on investment.

Mobile App Development

We create custom mobile applications that prioritize usability, security, and performance. DataBind Technology partners with clients throughout the development lifecycle, ensuring that each app not only meets market demands but also enhances customer engagement and satisfaction.

DataBind Technology's Services

IT Capacity building

DataBind Technology is committed to strategic growth by offering expert IT education, training, and consultancy services from school to university levels. We equip individuals across various sectors with actionable insights, technology assessments, and implementation strategies, empowering clients to drive effective transformation.

AI & Big Data Solutions

DataBind Technology empowers clients by integrating AI for predictive analytics, enabling data-driven decisions that enhance operational efficiency. Our advanced Big Data solutions provide real-time insights through customizable dashboards, ensuring clients harness their data securely and effectively.

AI & Machine Learning

DataBind Technology builds and deploys AI-driven solutions that foster innovation within organizations. Our machine learning models enable clients to automate processes, enhance decision-making, and unlock new revenue streams by leveraging their data effectively.

Cloud & DevOps Expertise

DataBind Technology supports clients in their cloud journey by offering tailored migration strategies and robust cloud security. Our DevOps practices foster collaboration and efficiency, enabling businesses to achieve faster deployment and improved system reliability in cloud environments like AWS and Azure.

IoT Innovation

DataBind Technology designs and implements IoT solutions that connect devices across various industries. We focus on creating secure, scalable systems that improve operational efficiency, allowing clients to monitor, control, and optimize their processes in real time.

Milestone Journey

Empowering Businesses
Worldwide with Tailored Tech Solutions.

DataBind Technology's success story is defined by a rich tapestry of global and local projects, reflecting our commitment to innovation and excellence. On the global stage, we have developed transformative solutions such as Cross-border Trade Finance & Global Payment System Automation, enabling seamless international transactions, and a Custom ERP system for our international clients, streamlining their operations. Additionally, our advanced FinTech projects are designed to enhance financial processes, positioning us as a leader in the sector.

Locally, we take pride in our impactful government initiatives, such as the Jamdani Saree Design Customization project, which empowers individuals to create personalized sarees, and the Potrojari Sohojikoron for the Roads and Highways Division (RTHD), enhancing transportation efficiency. In the private sector, we've successfully delivered eCommerce solutions, custom web applications, and websites, helping businesses thrive in a competitive landscape. This dual focus on global innovation and local impact underscores our dedication to transforming ideas into tangible, life-enhancing solutions.

DataBind Technology's success is driven by continuous growth and innovation, consistently expanding our capacity to deliver cutting-edge solutions. Our clients' satisfaction and trust reflect our unwavering commitment to excellence and impactful results.

Cross-border Trade Finance & Global Payment System

Type

Digital Financial Automation

Client

Zhejiang Chouzhou
Commercial Bank, China

浙江稠州商业银行
ZHEJIANG CHOUZHOU COMMERCIAL BANK

Cross-border Trade Finance & Global Payment System" is an electronic platform meticulously crafted to facilitate international trade transactions. By seamlessly connecting buyers, sellers, banks, and financial institutions, it optimizes the trade finance process. This system automates every step, from initiation to amendments, ensuring speed, security, and accuracy throughout. Specifically designed for Zhejiang Chouzhou Commercial Bank in China, this project underscores the strong partnership between DataBind Technology and China. Through this collaboration, we aim to leverage our expertise and resources to provide innovative solutions to global challenges. With its potential to enhance efficiency and transparency in trade finance, this project offers promising opportunities for fruitful cooperation on a global scale.

Custom Business ERP Solution

Type

Business Enterprise resource
planning (ERP) Solution

Client

Emat Global Company LTD

DataBind Technology developed a bespoke Business ERP solution for Emat Global Company LTD., headquartered in Pohang, Republic of Korea (ROK). Our tailored ERP system incorporates custom logic and specialized modules to address the unique operational needs of Emat Global.

This solution enhances efficiency and streamlines business processes, ensuring seamless integration across all departments. We continue to provide dedicated support to ensure the system's optimal performance and adaptability to evolving business requirements.

Jamdani Saree Design Customization

Type

Custom Web Application

Client

NarayanGanj, DC Office, Dhaka

The "Jamdani Saree Design Customization" project offers a unique option for individuals seeking personalized sarees for special occasions like weddings, festivals such as Eid, Pohela Boishakh (Bengali New Year), New Year celebrations, or any other event. Through the application, customers have the flexibility to select gradients for all sections, making the design entirely customizable. Upon completing their design, customers can connect with weavers to bring their specific designs to life. Additionally, weavers, designers, and retailers offer custom saree design services both in-store and online, collaborating with customers to create sarees that reflect their personal style.

It's noteworthy that the "Jamdani Saree Design Customization" project achieved the 2nd position at the "Dhaka Division Innovation Showcasing & Seminar 2023," with funding provided by the Narayanganj District Office.

Potrojari Sohojikoron

Type

Web-Based Application

Client

Roads and Highways Division (RTHD)
of the Bangladesh Government

"Potrojari Sohojikoron" is a project developed for the Roads and Highways Division (RTHD) of the Bangladesh Government. It serves as a platform for managing internal sensitive documents, including confidential inter-departmental documents and employee promotion-related work. This collaboration marks a significant milestone for DataBind Technology in its partnership with the Bangladesh Government. The project aims to streamline document management processes, ensuring confidentiality and efficiency in handling sensitive information within the government sector. As a trusted technology partner, DataBind Technology is committed to delivering innovative solutions that meet the specific needs of government agencies, contributing to enhanced operational efficiency and transparency in governance.

Integrated Custom Solution for KPI Foundation

Type

Custom Software

Client

The Knowledge Partnership Institute

DataBind Technology proudly presents a custom, integrated software solution for The Knowledge Partnership Institute Foundation (KPI). This advanced system is designed to manage all aspects of KPI's operations, including donation tracking, member services, global affairs, project management, and coordination with knowledge partners. It also supports research programs, scholarships, and fellowships while efficiently handling internal employee management. Tailored to meet KPI's unique mission, the solution ensures streamlined operations, fosters collaboration, and enhances the foundation's ability to make a global impact.

Global Trade Facilitation Platform

Type

Web-Based Trade Finance
Automation Solution

Client

The Global Trade Solutions

DataBind Technology has crafted a custom Web-Based Trade Finance Automation Solution for Global Trade Solutions, designed to make international trade processes smoother and more secure. This all-in-one platform empowers buyers, sellers, and intermediaries to manage their commodity transactions effortlessly, with a strong emphasis on efficiency and security.

By automating RMA applications with international banks and speeding up response times, the platform ensures sensitive data is protected while staying compliant with global regulations. With real-time updates and user-friendly tools, it helps reduce market risks and boosts operational efficiency, enabling Global Trade Solutions to build meaningful global connections and achieve sustainable success.

Partner & Clients

Voice of Satisfaction

★★★★★

DataBind Technology's Jamdani Saree Design Customization platform has revolutionized our approach to traditional craftsmanship. The application is intuitive, and the ability to collaborate with weavers is a game-changer. Their dedication made this innovation possible.

District Commissioner
